

Eating Healthy, Fast

A Hoover plan for identifying and choosing quick, healthy options — before hunger does the choosing.

You don't fail from knowledge. You fail at 12:40, hungry.

The information was never the problem. The **decision moment** is: rushed, hungry, whatever is closest wins.

**Fix the decision moment,
not your willpower.**

Three filters. Thirty seconds. Every menu.

If you can't name the protein, it isn't a meal.

Guardrails stop portion creep.

- R1 Order the regular, not the large.
- R2 Sauce and dressing always on the side.
- R3 Water first — before the food arrives.
- R4 Eat the protein before the carbs.
- R5 **One off-plan meal is fine. The plan is the pattern, not a single meal.**

Five things that look healthy and aren't.

Salads built on fried chicken and creamy dressing
Often heavier than the sandwich you avoided

Smoothies treated as a meal
Liquid, low protein, gone in four minutes

Sweet tea and lemonade
The default drink in this metro — ask for unsweet

Combo meal upgrades
A side and a cup you did not actually want

Items labeled “grilled” that arrive glazed in sugar
Read the description, not the label

Pick one bowl place. Save one exact order. Done.

The plan works because the decision is already made before hunger arrives.
